

COMPANY OVERVIEW

>>>

eQube Gaming Ltd. (TSX.V - EQG) has been providing eBingo to casinos, tribes & commercial operators globally for more than 17 years. eQube has been designed by bingo operators for bingo operators. Delivering profitable stand alone bingo halls & bingo lounges in casinos provides 'oxygen' to slot floors with new customers. eQube solutions deliver improved customer experience, environment and service.

eQube's quintessential suite of tools include:

- System wide modular functionality
- Flexible caller functions
- Programmable point of sale
- Paper inventory management
- Linked & Wide area bingo options
- A powerful membership/loyalty module
- An enterprise class accounting system
- Customizable scheduling and/or on-the-fly game substitution
- A wide variety of electronic devices ranging from touchscreen PC's to the eQube rugged handheld, or the ability to deploy gaming to a player's own tablet or phone.

LEADING THROUGH EMPOWERMENT

>>>

The eQube product range has been designed to be flexible, customizable and scalable to operator's needs with a particular focus on empowering bingo club managers to run the business *they* want to and not be limited by technology.

With the flexibility eQube provides, operators have a single view of their customer using a single wallet that they can then integrate to third party systems, games or content for additional benefit to their business.

SUCCESS THROUGH MARKET INSIGHT

>>>

eQube understands that all operators wish to increase attendance and spend per head while providing a valuable entertainment, hospitality and gaming service to their consumers. This is why we provide the tools that we do, so bingo operators can deliver a sustainable bingo business with products and features that have been proven, tried and tested the world over as features players will love.
